

CS 471 Senior Capstone I, Fall 2025

Case Study Activity #2

Procedures. In a group, look at the slide deck named below. Consider and discuss the questions.

Slide Deck. *Case Study: Healthcare.gov* (PDF linked on the class webpage)

Question #1

- Does the slide deck do a good job of providing the information it is supposed to? (Is this done in an understandable way?)

Question #2

- Is the slide deck organized well? (Is the information presented in a reasonable order? Can you always tell where you are in the presentation by looking at the current slide?)

Question #3

- Is the slide deck formatted well? (Is it readable & scannable? It is attractive? Is it too busy?)

Question #4

- Is there anything else you would like to point out about this slide deck—good or bad?

Question #5

- Summarize as briefly as you can: what is the main thing that went wrong with this project (the software project, not the slides)?
